<b>Extensions</b> What extra features would enhance the page?	

# CLIENT WORKSHEET

	Example 1	Example 2
<b>Topic / Theme</b>	Portfolio	ISS Information Website
<b>Audience</b> Who will use the website?	Future Employers	Space Enthusiasts
<b>Description</b> What will the website be about?	A portfolio page with my name and a showcase of the projects I have done!	A website where people can learn about the ISS and they can put their location and see when the ISS will pass over!
<b>Accessibility</b> How should users with special needs use your site?	All images should have alt text so they can be read by a screen reader.	Allow users to increase the text size.
<b>MVP Requirements</b> What must the product do?	There should be a display / gallery with multiple projects on the same page.  Each project should have an image, title, and description.	Users should be able to input their location and know when the ISS will pass over them.  There should be a blog about the ISS.  Use ISS API.
<b>Extensions</b> What extra features would enhance the page?	I want the use to be able to hide and show longer descriptions of my projects.	Users should also be able to click to update and see the current location of the ISS. Draw a map showing its location.
